37 CFR 1.105 REQUIREMENT FOR INFORMATION

1. Applicant (or the assignee of this application if the assignee has undertaken the prosecution of the application) is required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.
2. There are numerous other co-pending applications and issued patents, which disclose and claim very similar and/or identical subject matter. In accordance with 37 CFR 1.105 and MPEP 704.11(a) subsection G, applicant (or the assignee) is respectfully requested to disclose all co-pending applications and related patents (please see the non-exhaustive list below of applications and issued patents that the USPTO believes may be related) and identify the specific claims of those applications and/or patents which may present double patenting issues with the instant application claims. This requirement is reasonably necessary to examination because, based on an initial review of the applications, there is a significant degree of overlap in claimed subject matter, thus requiring an analysis of commonality of claimed subject matter to determine patentability under 35 USC 101 double patenting and/or obviousness type double patenting. For example, claims 1,3-10 of application 10/653,027 are generic to the claimed invention of the patent 6,926,730 as claimed in claim 1 and 6. The conflicting claims are not identical, they are not patentably distinct from each other because they contain the same subject matters: a surgical fastener, a first needle, a second needle, flexible members coupled to needles and the ends of the surgical fastener/clip. **Although, the claimed invention of the present application does not**

Art Unit: 3731

include some of the claimed limitations of claims in the patent such as a needle holder, the claims of the present application are anticipated by the claims of the patent.

3. Because the applicant (or the assignee) is presumably far more cognizant of the contents of the claims in these applications than any Office staff, and has access to the source documents by which such comparison could be done better than within the Office, it is reasonable to require the applicant to provide the information needed to determine the commonality among the claims.

4. Should applicant (or the assignee) believe that Double Patenting exists, then applicant (or the assignee) is invited to file Terminal Disclaimers and/or amend the currently pending claims in the interest of expediting the prosecution of the current application. Applicant (or the assignee) should note that a terminal disclaimer is effective to overcome an obviousness type double patenting rejection, but will not overcome a "same type" double patenting rejection under 35 U.S.C. § 101.

5. Non-exhaustive list of possible related co-pending applications and patents:

10/340,161
10/364,064
10/408,019
10/439,973
10/985,768
10/715,797
10/718,236
11/007,825
11/218,824
6,641,593
6,607,541
6,945,980

Art Unit: 3731

6. This requirement is subject to the provisions of 37 CFR 1.134, 1.135 and 1.136 and has a shortened statutory period of 2 months. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Response to Arguments

7. Applicant's arguments have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
